

Final Project : Group Project (4)

Make group of up to 4 people in your team.

Your final project is important as an evaluation of your experience and practice of programming using C#. Feel free to choose your topics to invent your own as a start point to build your project: Like,

- Resume Manager
- Inventory Management
- Blog
- Library management
- Condo Management System
- Choose your own idea

Your tasks for the final project are as follows:

- Demonstrate
 - Use of data types
 - Use of Models, Objects, Classes
 - Use of Events, Actions, Error Handling
 - Data using CRUD operations
 - Acquire data from an external source (SQL Server, API, Azure SQL Database)
 - Use of any data interchange formats JSON, XML
 - Consider an import/export function for example
- Use one of the following project types to demonstrate your idea
 - Console Application
 - Windows Application
 - Web Application
 - MVC Application
- Your tasks include
 - Database
 - Front End
 - Back End
 - Presentation of Application
- Ensure that your group member's names are clearly displayed on the first page of your application
- Present / Submit your project
 - Create a 15 minute video of your presentation that shows demo of your work with input output screen shots.
 - Submit a link to your repository in Blackboard
 - Submit a link to your video on Blackboard.
 - Submit your presentation on Blackboard.
